TABLE OF CONTENTS

Introduction

1. Summary Overview – Drink & Food Products

- Table Security risks - Product related through the supply chain in Drink & Food Products
- Table Countermeasures – Appropriate to product related crime in Drink & Food Products
- Table Propensity to produce or consume counterfeited Food and Drink products - OECD
- A Brief History of Counterfeiting of Drink & Food Products

2. Drink Products

2.1 Market Overview – Industry structure & leading companies – Drink Products

2.2 Product Related Crime – Drink Products

2.2.1 Case Study - High rates of Excise Duty on Alcoholic Drinks naturally attract smuggling and counterfeiting

2.2.2 Case Study - UK Food Standards Agency Issues Warning on Counterfeit Vodka in 2005

2.2.3 Case Study - Fraud Database Leads to Vodka Raid in the United Kingdom in 2008

2.2.4 Case Study – Counterfeit Product / Packaging - Johnnie Walker Whisky

2.2.5 Counterfeiting and Product Quality in the Wine Industry

2.2.6 Case Study - Perrier Sparkling Water Benzene Contamination – Handling a Product Recall – Limitation of Damage to a Brand

2.3 Brand Protection – Drink Products

2.3.1 Tamper Evident Packaging – Shrink sleeves in the Liquors / Spirits market

2.3.2 Tamper evident and non-refillable closures for Liquors / Spirits

2.3.3 Brand Protection of Premium Wine and Fortified Wine

2.3.4 Case History – A new high tech anti-counterfeiting technology from Kodak Helps Napa Valley Wineries Fight Wine Fraud

- 2.3.5 Case Study – eProvenance RFID enabled Brand Protection Technology for Fine Wine
 - 2.3.6 Case Study – InkSure and eProvenance have formed a Technology Alliance to protect the Fine Wine Market
 - 2.3.7 Case Study - Smartcorq – RFID enabled wine cork provides information about a wine’s background (Time / Temperature profile)
 - 2.3.8 Case Study – A Hotel in Mexico adopts RFID to prevent Wine Theft
 - 2.3.9 Case Study – Sea Smoke Winery – RFID Tagged Barrels
 - 2.3.10 Rioja Wine Label with Generic Hologram
 - 2.3.11 Molecular Micro-tagants – Drink Products
- 2.4 Opportunities for Brand Protection Solutions Providers – Drink Products

3. Food Products

- 3.1 Market Overview – Industry structure & leading companies – Food Products
- 3.2 Product Related Crime and Product Related Quality Issues – Food Products
 - 3.2.1 Case Study - Food Alert – Product recall following detection of potential carcinogen in Honey in Scotland in 2005
 - 3.2.2 Case Study - Melamine traces found in Fake Protein Powder in Milk Products for Children in China
 - 3.2.3 Case Study – Artificial colouration of edible olives with non-edible shoe polish in Egypt
 - 3.2.4 Types of Tampering in the Food Sector
- 3.3 Brand Protection – Food Products
 - 3.3.1 Threats to Brands in the Food Sector Continue to Build - Additional Forces are Emerging– Manufacturer’s Responsibility, International Terrorism, Bio Terrorism
 - 3.3.2 Bioterrorism Act of 2002 - Counter-terrorism related legislation - A significant Issue for Food Producers
 - 3.3.3 Case Study - Leading Mexican tomato and pepper supplier Del Campo to deploy brand protection technology HarvestMark from YottaMark
 - 3.3.4 Case Study - Brand Protection Packaging for Nutritional and Diet Products – The Experiences of Two Companies - Abbott Laboratories / Trimspa Inc

- 3.3.5 Overview - Forms of tamper evident packaging used in the Food Sector
- 3.3.6 Case Study - Tamper Evident Consignments - Pallet Loads carrying Multiple Cases of Fresh Vegetables
- 3.3.7 Case Study - Tamper Evident 50lb pack for Seasonings, Herbs, Spices and other Dry Flavor Systems
- 3.3.8 Food Quality and Freshness – An Essential Aspect of Brand Protection in the Food Sector
- 3.3.9 Smart / Intelligent Labels
- 3.3.10 Freshness Labels and the Like – For Food Products
- 3.3.11 Time-Temperature (TTI) Devices used in the Food Sector
- 3.3.12 Case Study – French Retail Chain Monoprix – Time/Temperature and Freshness Indicator Labels
- 3.3.13 Case Study - 3M MonitorMark Time/Temperature Indicator (TTI) Tag
- 3.3.14 Schreiner e-temp-label - Time/Temperature Indicator (TTI) RFID Label
- 3.3.15 Case Study - Biott Time/Temperature Indicator (TTI) Labels - Brand Protection Applications in the Food Sector
- 3.3.16 Case Study - The Timestrip™ Family of Time/Temperature Indicators and the Like
- 3.3.17 Forecast Evolution of Date Code Technologies – For Food Products
- 3.3.18 Management of Cold Chain Issues in the Food Sector
- 3.3.19 Profile of a Tesco Cold Chain DC project
- 3.3.20 RFID for Brand Protection and Security in the Food Industry
- 3.3.21 Case Study – Ballantine Produce Co - Tracking Movement of Peaches and Nectarines with RFID
- 3.3.22 Case Study - Nestle Deutschland – RFID Labels for Food Products
- 3.3.23 Case Study – Norwegian Food Group Nortura to Track Meat
- 3.3.24 Case Study - Marks & Spencer Creates RFID Supply Chain for Refrigerated Foods – Worldwide Fruit Limited
- 3.3.25 RFID Labels in Supermarkets / Hypermarkets

3.3.26 Brand Protection and RFID in Retailing

3.3.27 RFID enabled Intelligent Freezer – Metro Group

3.4 Opportunities for Brand Protection Solutions Providers – Food Products

3.4.1 Nano-Technology – A Big Future for Brand Protection for Food Products

4. Security features (and systems) used in labelling and packaging applications for Drink & Food Products

4.1 How authentication technologies can assist in the fight against product piracy

4.2 Introducing a simple method of validation for customs inspection

4.3 Developing an inspection tool or security feature that assists in identifying suspected spurious Drink & Food products

4.4 Providing assurance to end users

4.5 Case Study - Counterfeit vodka laced with toxic household agents created a deadly cocktail that killed dozens of Russians in 2006

4.6 Is it possible to develop a single, global anti-counterfeit device that will be recognised and used in all applications?

4.7 Applying the right strategy and tactics to anti-counterfeiting and anti-tampering initiatives

4.8 Developing a layered approach to product protection

4.9 Levels of Defense in Brand Protection

4.10 Case Study – Cost effective security packaging for Tea comprising a combination of multiple functions integrated into a single label

4.11 The importance of being able to prove provenance

4.12 How install a resilient and adaptable system

4.13 How to protect against theft in the supply chain and on the retail shelf

4.14 How to protect against tampering, grazing and extortion risk

4.15 Marking packaging so that products can carry their own self-validating features

4.16 Adapting paper labels

4.17 Using swing tickets and tags

- 4.18 Adapting primary packaging and adding tear tapes
- 4.19 Forensic (invisible) marking methods and compounds for products and components
- 4.20 Case Study - Genotyping and DNA Marking to combat Wine Counterfeiting
- 4.21 Direct Visible Marking Methods for Food Packaging
- 4.22 Security Labelling (Base) Materials
- 4.23 Security Packaging (and Cap Sealing) Materials
- 4.24 Security Tags and Swing Tickets
- 4.25 Security Materials for use in the Drink & Food Sector
- 4.26 Adding Security to Glass Containers
- 4.27 Brand Protection Features
 - 4.27.1 Special Inks
 - 4.27.2 Embossing, Holograms and Foils
 - 4.27.3 Films and Overlays (including Polarisers)
 - 4.27.4 Chipless Tags
 - 4.27.5 Radio Frequency (RFID) Devices
- 4.28 Ink jet Marking
- 4.29 Transfer Ribbon Marking
- 4.30 Laser Encoding – On-product and Ink Activated
- 4.31 Linking Serial Marking to Authentication Databases
- 4.32 Using the Internet and SMS Messaging to Provide Provenance Advice
- 4.33 Product Marking with Encrypted (2d) Bar Codes
- 4.34 Surface Feature Identification
- 4.35 Protecting Brands on the Worldwide Web
- 4.36 Cost and Relative Security Performance Measurement
- 4.37 Summary – Security Features
- 4.38 Opportunities for Manufacturers of Brand Protection Solutions – Drink & Food Products

Appendices

Appendix I Brand Protection Solutions – A new series of 10 targeted end user sector specific market reports from Vandagraf International

Appendix II Major multi-client report: The International Markets for Brand Protection Solutions – 2nd Edition (Publication date: January 2008) - A techno-economic market review
