

Low-Cost RFID Smart Labels

International Markets & Opportunities in Europe & North America

A Techno-economic Market Review

2nd Edition
January 2007

Authors:

James Bevan with inputs from Mike Fairley and Jeremy Plimmer

Table of Contents

Executive Summary

EXEC 1	Forward
EXEC 2	Background
EXEC 3	Defining the scope of the report
EXEC 4	Low-cost RFID smart labels (silicon chip-based, chipless)
EXEC 5	Cost aspects
EXEC 6	The Self-adhesive label as a carrier of choice for RFID inlays
EXEC 7	Label types
EXEC 8	Self-adhesive RFID labels
EXEC 9	World markets for all types of labels
EXEC 10	The role of label printer / converters
EXEC 11	The potential advantages / disadvantages of low-cost RFID smart labels
EXEC 12	Demand side drivers
EXEC 13	Mandates to suppliers by retailers and the US DoD
EXEC 14	Supply side - Manufacture of RFID labels
EXEC 15	Barriers to progress
EXEC 16	Standards & frequency issues
EXEC 17	Europe versus North America – Rate of RFID Label adoption
EXEC 18	Priority Benefits for RFID Labels for Different End-user Sectors
EXEC 19	Technologies that compete with RFID Labels
EXEC 20	Forecasts for Worldwide Markets for Low-cost RFID Smart Labels by Value and by Volume – 2005 to 2015.
EXEC 21	Forecast additional demand for film substrate material for chip based RFID inlay carriers

Introduction – Low-Cost RFID Labels

INTRO 1 RFID An introduction

INTRO 1.1 RFID Defined

INTRO 1.2 Background

INTRO 1.3 Historical Timeline – RFID Technology

INTRO 1.4 Markets for Auto-ID Technologies

INTRO 1.5 Low-Cost RFID Smart Labels Versus Bar Codes

INTRO 2 Types of RFID Label

INTRO 2.1 2 Major Frequency Ranges - Low-cost RFID Smart Labels

INTRO 2.2 EPC UHF Low-cost RFID Smart Labels - 900 (868 – 915) MHz

INTRO 2.3 The Need for 'Flat Response' UHF Gen 2 RFID Antennae / Inlays for Global Operability

INTRO 2.4 Case Study - Omron Introduces New Gen 2 RFID Inlays

INTRO 2.5 HF Low-cost RFID Smart Labels - 13.56 MHz

INTRO 2.6 Main Characteristics of HF Versus UHF Low-cost RFID Tags / Labels

INTRO 2.7 Product Offerings – Components Versus Finished Labels

INTRO 3 Low-cost RFID Label Types & Form Factors

INTRO 3.1 Pallet / Case Level VIP RFID Labels

INTRO 3.2 Prime Item Level RFID labels

INTRO 3.3 RFID Labels with Innovative Constructions

INTRO 3.3.1 Flag Tag – Rafsec / Sato

INTRO 3.3.2 Space Tag – Paxar

INTRO 3.3.3 RFID Enabled Hang-Tags / Swing-Tickets

INTRO 3.3.4 Tubular Woven Labels

INTRO 4 RFID Label Printing and Over-printing

INTRO 4.1 Background to RFID Label Printing

INTRO 4.2 Printing Process Options:

INTRO 4.3 Annual Sales of Narrow Web Roll Label Presses –
Evolution of Market Share

INTRO 4.4 RFID Enabled Desktop Label Printers Printers & Printer / Applicators

INTRO 5 The Basics of RFID Inlay / Label Manufacture

INTRO 5.1 Low-Cost RFID Smart Inlay Construction

INTRO 5.2 Strap Attachments (Fixing Silicon Chips to Antennae)

INTRO 5.3 RFID Label Laminate Construction - Triple layer & Dual layer

INTRO 5.4 Creating an RFID Smart Labelstock

INTRO 6 Driving Down Unit Cost of RFID Labels

INTRO 6.1 Printed RFID Antennae

INTRO 6.2 Chipless and other Related RFID Technologies

INTRO 6.2.1 Chipless RFID Technology – Inkode Corporation

INTRO 6.2.2 Chipless RFID Concept - Scientific Generics Flying Null Magnetic Bar
Code

INTRO 6.2.3 Chipless RFID Technology - Surface acoustic wave (SAW)

PART A - End-Users

A.1. Retailers – Low-Cost RFID Smart Labels

A.1.1 The World's Leading Retailers

A.1.2 RFID Labels in the Retail Chain

A.1.3 Retailing of Fast Moving Consumer Goods (FMCGs) - Supermarkets / Hypermarkets

A.1.3.1 Low-Cost RFID Smart Labels in Retailing

A.1.3.2 Low-cost RFID Smart Label Pilots – First Mover Retailers

A.1.3.3 RFID Labels in Supermarkets / Hypermarkets

A.1.3.4 Case Study - Wal-Mart, US - The First Retailer to Mandate Low-cost RFID Smart Labels

A.1.3.5 Case Study - Metro Group, D – RFID European Retailer Pioneer Forging Ahead – Major RFID Rollout Envisaged in 2007

A.1.3.6 Case Study - Tesco plc, UK - An Early Adopter of RFID Labels in Europe with 2 RFID Projects - Secure Supply Chain Program for Pallets / Cases – DVDs at Item Level on Smart Shelves

A.1.4 Retailing of Clothing (incl. Sportswear and Footwear)

A.1.4.1 The World Market for Retail Clothing (incl. Sportswear and Footwear)

A.1.4.2 Out-of-stocks (OOSs) - A Major Concern for Clothing Retailers

A.1.4.3 RFID Labels for Retail Clothing

A.1.4.4 Case Study - Marks & Spencer (M&S) - Two Separate RFID Pilots and Rollouts (Item Level – Clothing / Fruit – Returnable Packaging)

A.1.4.5 Case Study - Metro Group - Kaufhof Warenhaus AG and Fashion Company Gerry Weber International AG

A.1.4.6 Case Study - Benetton – Item Level Clothing RFID Label / Tag Pilot Halted Due to Privacy Concerns

A.1.4.7 Case Study - Prada Fashion – An Innovative Early Experiment with RFID Technology at Item Level in a Clothing Retail Setting

A.1.5 Retailing of Consumer Electronics

A.1.5.1 Digital Televisions & DVD Players

A.1.5.2 DeskTop, LapTop Computer Hardware & Consumables

A.1.5.3 Mobile Cellphones

A.1.5.4 RFID Labelling – Consumer Electronics - Potential Financial Benefits
for Manufacturers and Retailers

A.1.5.5 Cost Aspects - Consumer Electronics - RFID Adoption

A.1.5.6 Case Study – Best Buy – US Retailer of Consumer Electronics
Products Implementing Vue Technology Smart Shelves

A.1.5.7 Retail Trends for Interactive Video Games

A.1.5.8 Smart Shelves – Vue Technology

A.1.6 Early Versus Late Adoption – RFID Technology in Retailing

PART A End-Users

- A.2 Brand Owners - Low Cost Passive RFID Labels**
- A.2.1 **The World's Leading Brand Owners – FMCGs (Fast Moving Consumer Goods)**
- A.2.2 **Leading Brand Owners - Early Involvement in RFID Labelling - The Auto-ID Center**
- A.2.3 **'Slap & Ship' - A Minimal Approach to RFID Labelling has been used by Some Brand Owners**
- A.2.4 **Product Packaging can be Designed to be RFID Friendly**
- A.2.5 Brand Owners - Fast Moving Consumer Goods (FMCGs)**
- A.2.5.1 Case Study - Gillette - Shaving Products
- A.2.5.2 Case Study - Nestle Deutschland - RFID Labels for Food Products
- A.2.5.3 Case Study - Unilever Germany - RFID Labels for Home & Personal Care Products
- A.2.5.4 Case Study - Kimberly Clark, US - Paper Products
- A.2.6 Brand Owners - Clothing (incl. Sportswear and Footwear)**
- A.2.6.1 Case Study – Lemmi Fashion, D
- A.2.6.2 Case Study – Levi Jeans – RFID Labels for Item Level RFID Tagging / Labelling of Clothing in Mexico and the US
- A.2.6.3 Case Study - VF Corp - RFID Labels for Item Level RFID Tagging / Labelling of Clothing
- A.2.7 Brand Owners - Consumer Electronics**
- A.2.7.1 Case Study - Hewlett Packard (HP), US
- A.2.8 Early Versus Late Adoption – Pros & Cons**

PART A - End-Users

A.3 Pharmaceuticals and Healthcare Products - Low Cost Passive RFID Labels

A.3.1 Overview of the Pharmaceuticals and Healthcare Sectors

A.3.1.1 The World's Leading Brand Owners – Pharmaceuticals and Healthcare Products

A.3.1.2 The Market and Growth Opportunities - Pharmaceuticals and Healthcare Products

A.3.1.3 Future Trends in Pharmaceuticals and Opportunities in RFID Labelling

A.3.2 RFID in the Pharmaceuticals and Healthcare Sectors

A.3.2.1 Adoption of Low-Cost RFID Smart Labelling - Pharmaceuticals and Healthcare Products

A.3.2.2 Potential Benefits of RFID in the Pharmaceuticals and Healthcare Sectors

A.3.2.3 Forecast Time-scales for RFID in the Pharmaceuticals and Healthcare Sectors

A.3.2.4 Case Study - Astra Zeneca, UK – An Early Adopter of Chipless RFID Labels - Recognition Feature / Electronic Handshake

A.3.2.5 No Single Standard Frequency in Sight for Item Level RFID Labelling of Pharmaceuticals Products - UHF versus HF

A.3.2.6 Case Study - Pfizer / Viagra – HF RFID Labelling at Item Level

A.3.2.7 Case Study - Purdue Pharma / OxyContin – Item Level UHF RFID Labelling

A.3.2.8 Case Study - Cardinal Health – Pilot Completed in 2006 - UHF RFID Labels at Pallet, Case and Item Level

A.3.2.9 Case Study - GlaxoSmithKline (GSK) Tests RFID on HIV Pharmaceutical Product - HF RFID Labels at Item Level

A.3.2.10 Profile - Aegate Project – Authentication at the Point of Dispensing

A.3.2.11 Profile - CVS/pharmacy Inc. – US based Pharmaceuticals Retailer - Smart Shelf Pilot

A.3.3 Track and Trace - Audit Trail and Pedigree - RFID Labelling - Pharmaceuticals and Healthcare Products

A.3.3.1 The Need for Pedigree Laws for Pharmaceuticals is Compelling Today

- A.3.3.2 Pedigree Laws – How they work - Flow of Data and Accountability
- A.3.3.3 Electronic versus Paper-Based Pedigree Systems
- A.3.3.4 Pedigree Laws for Pharmaceuticals – The US Food & Drug Administration (FDA)
- A.3.3.5 Pedigree Laws for Pharmaceuticals – Individual US States
- A.3.3.6 European Pedigree Regulations for Pharmaceuticals will Come
- A.3.3.7 Case Study - Cap Gemini Drug Security Network (DSN) Lab - To Facilitate Implementation of electronic pedigrees
- A.3.3.8 EPCglobal Ratifies E-Pedigree Standard

PART A - End-Users

A.4 Military Applications – Low-Cost RFID Smart Labels

A.4.1 World Armed Forces & Defense Spending

A.4.1.1 National Armed Forces around the World – Number of Personnel

A.4.1.2 Armed Forces for the leading European EU member countries

A.4.1.3 Defense Spending in Selected Countries

A.4.2 US Armed Forces

A.4.2.1 US Department of Defense (DoD) / Defense Logistics Agency (DLA)

A.4.2.2 Case Study - RFID in the First Gulf War in 1991

A.4.2.3 Case Study - RFID in Iraq – New and Repaired Parts – Sense & Respond Logistics

A.4.2.4 DoD / DLA and RFID – Active RFID Technology

A.4.2.5 The Linking of Active and Passive RFID tags / labels through the DoD / DLA Supply Chain

A.4.2.6 US DoD / DLA – The Introduction of Passive RFID Labelling Technology

A.4.2.7 DoD / DLA Supplier Implementation Plan & Guidelines

A.4.2.8 DoD / DLA Supplier Implementation Plan

A.4.2.9 Updated Mil Standard for Package Labelling

A.4.2.10 The US DoD / DLA Approach to their Respective Suppliers Differs from that of Major Retailers

A.4.2.11 Key Differences between DoD / DLA and Retailers

A.4.2.12 Overcoming Initial Difficulties with Implementation

A.4.2.13 Case Study – Read-rates – Ramstein Air Force Base in Germany

A.4.2.14 Case Study - Lockheed Martin

A.4.2.15 Case Study – Savi Technology, US – SmartChain Consignment Management Solution (CMS)

A.4.2.16 Case Study - Avery Dennison Wins DoD / DLA Purchase Agreements

- A.4.3 The Wider Impact of the DoD / DLA Mandates - Beyond the US**
- A.4.3.1 NATO (North Atlantic Treaty Organisation)
- A.4.3.2 NATO - Low-cost RFID Technology – Roll-out is Starting
- A.4.3.3 Case Study - Syscan International's newly developed ICE (Intelligent Communication Enabled) network technology.

PART A - End-Users

A.5 Third Party Logistics Operators – Low-Cost RFID Smart Labels

A.5.1 Logistics Sector – Evolution of Industry Structure

- A.5.1.1 Different Types of Third Party Logistics Operators
- A.5.1.2 Trend to consolidation in the Third Party Logistics Operator Sector
- A.5.1.3 Leading Air Express Cargo Companies (DHL, Fedex, UPS)
- A.5.1.4 Case Study - Kuehne-Nagel (K+N) – World No 1 in arranging seaborne cargo
- A.5.1.5 The World's Leading Third Party Logistics Operators - Contract Logistics
- A.5.1.6 Large-scale Highly Automated Retailer Distribution Centres
- A.5.1.7 Profile Tesco Frozen Crick Project – Third Party Logistics Contractor Exel

A.5.2 Low-Cost RFID Smart Labels – Third Party Logistics Operators

- A.5.2.1 Low-Cost RFID Smart Labelling in a Warehouse Environment
- A.5.2.2 RFID Labelling & Warehouse Management Systems (WMS)
- A.5.2.3 Enhancing the Services That an RFID Enabled Third Party Operator Can Offer Customers
- A.5.2.4 Third Party Operators can also Obtain Internal Benefits from RFID
- A.5.2.5 Requirements for Different Types of RFID across a Complex International Supply Chain
- A.5.2.6 DHL - 3 Distinct Areas of RFID implementation: Fashion Logistics, Retailer Metro Group project, Postal services
- A.5.2.7 UPS (United Parcel Services) – A Pro-active Investor in RFID Technology
- A.5.2.8 Case Study - Unipart Logistics, UK - A new service combining radio frequency identification, GSM/GPRS and GPS technologies
- A.5.2.9 Case Study Deutsche Post Corporate Security – RFID Enabled Tamper-evident Packaging
- A.5.2.10 Case Study Metro Group - Future Store - Product Flow System
- A.5.2.11 Formation of the EPCglobal Logistics and Transportation Group

PART B **Drivers & Barriers**

B.1 **Background – Drivers & Barriers**

B.1.1 Drivers & Barriers - Low-cost RFID Smart Labels

B.1.2 Unit Price Falling by end 2005 - Low-cost RFID Smart Labels

B.2 **Key Triggers / Benefits / Regional Focus - The Low-Cost Passive RFID label Revolution**

B.2.1 Key Triggers by End-user Sector

B.2.2 Key Benefits for End-Users (Retailers, Brand Owners, Pharmaceuticals, Military, Third Party Logistics Operators)

B.2.3 Retailer Primary Aims and Focus by Region (Europe versus North America)

B.2.4 Distribution and Retail – Business Practices in Europe and North America

B.3 **European Retail and Branded Products Industry Focus**

B.3.1 Reduction of OOS (Out-of-Stocks) / Increased Product Availability and Other Secondary Benefits - A Key Benefit for Retailers

B.3.2 Primary Benefit of Low-cost RFID Smart Labels for Retailers - OOS (out-of-stocks)

B.3.3 Reduction of OOS (Out-of-Stocks) / Increased Product Availability and Other Secondary Benefits

B.3.4 Traditional Approach to Re-stocking Retail Shelves

B.3.5 The Low-cost RFID Smart Label Way of re-stocking Retail Shelves - Practical Benefits of Low cost RFID Labels

B.3.6 RFID Labelling of Returnable Packaging Units in Retailing (eg: Plastic Trays)

B.3.7 OOS (Out-of Stocks) – Industry Average Levels

B.3.8 Case Study - Wal-Mart Has Achieved Early Success with Low-Cost Smart RFID Labels achieving 16% reduction in OOS (out-of-stocks) in 2005

B.3.9 Limited Duration Special Promotions - The ‘Bullwhip Effect’ – Amplification of Stock Level Fluctuations Along Supply Chains

B.3.10 Case Study – Procter & Gamble (P&G) – Joint Venture to Improve Supply Chain Visibility and Replenishment Performance

- B.3.11 The Benefits Stack - The Impact of Widespread Usage of RFID Smart Labels for Retail Products will be Far Reaching
- B.3.12 The Virtuous Circle of Potential Benefits for Retailers
- B.3.13 Mandates to Suppliers by Retailers

- B.4 Product Related Crime / Counterfeiting / Brand Protection**
- B.4.1 Background to Brand Protection Issues
- B.4.2 Variations on the Theme of Counterfeiting
- B.4.3 Worldwide Losses from Product Related Crime from 2000 to 2002 with Forecasts to 2010
- B.4.4 The Pharmaceutical Sector is at Particular Risk in Relation to Product Related Crime
- B.4.5 The Urgent Need for Brand Protection in the Pharmaceuticals & Healthcare Sectors
- B.4.6 Pharmaceutical Packaging – Security Features
- B.4.7 The Increasing Role for RFID Labelling in the Fight against Counterfeiting

- B.5 The Need for Global Standards – Radio Frequency & Power Aspects**
- B.5.1 A Summary of the Full Radio Frequency Spectrum
- B.5.2 Frequency Bands Reserved for Non-Label RFID Applications
- B.5.3 The Two Dominant Frequency Ranges for RFID Labels – UHF versus HF
- B.5.4 Developments in Global Standards for RFID Labels
- B.5.5 Towards Global Usage of UHF RFID Labels - Regional Differences in Usable Frequency Ranges for UHF RFID Labels
- B.5.6 European versus US RFID Regulations
 - B.5.6.1 The EU and RFID Labels
 - B.5.6.2 The Dense Reader Issue / Listen-Before-Talk – EU Regulations

B.6	Consumer Privacy - A Key Issue for Consumers
B.6.1	Background to the Consumer Privacy Furore – RFID Labelling
B.6.2	History of RFID and Consumer Privacy
B.6.3	Consumer Privacy Related Regulatory Actions
B.6.4	Case Study - Marks & Spencer (M&S) – Addressing Consumer Privacy Concerns – Item Level RFID Labelling of Clothing
B.6.5	Case Study - The Aegate Approach - A Pro-active 'Privacy Code of Conduct'

PART C - Forecasts

- C.1 Low-Cost RFID Smart Labels - Very High Growth Potential is Leading to Major Market Opportunities**
- C.2 Value Growth Forecasts - RFID Markets by Region - Low-Cost RFID Smart Labels - 2005 to 2015**
- C.3 Volume Growth Forecasts - RFID Markets (Global, Europe & North America, Low-Cost RFID Smart Labels) - 2005 to 2015**
- C.4 Volume Growth Forecasts - Pallet / Shipping Case / Item Level - 2005 to 2015**
- C.5 Volume Growth Forecasts - Breakdown by End-User Sector (Retail Supply Chain, Pharmaceuticals, Military, Third Party Logistics Operators, Non-Label RFID Tags) - 2005 to 2015**
- C.6 Volume Growth Forecasts - Silicon Chip-Based RFID Labels versus Chipless RFID Technologies - 2005 to 2015**
- C.7 Value Growth Forecasts - Components of the Low-Cost RFID Smart Label Market (Labels, Readers and other Hardware, Software, Integration Services) - 2005 to 2015**

APPENDICES

APPENDIX I	EPCglobal Tag Classes
APPENDIX II	The Auto-ID Center and the EPCglobal GS1 (Global Standard) Organisation
APPENDIX III	The EPCglobal Network
APPENDIX IV	Important Advantages Come with the New Gen2 RFID Standard
APPENDIX V	Towards Global Harmonisation for UHF RFID
APPENDIX VI	Issues around Intellectual Property Rights and Patents
APPENDIX VII	Historical Evolution of Bar codes
APPENDIX VIII	Optical Codes - Linear Bar codes and 2D / Matrix codes
APPENDIX IX	EAS – Electronic Article Surveillance (Anti-Theft) Tag / Labels – Binary On / Off – Not RFID

GLOSSARY OF TERMS

VANDAGRAF INTERNATIONAL LIMITED

ACKNOWLEDGEMENTS

List of Tables

Table 1.1	Historical Timeline – RFID Technology
Table 1.2	Key RFID Label Characteristics versus Key Bar Code Characteristics
Table 1.3	Overview of Main Characteristics of HF and UHF RFID Labels
Table A.1.1	The World's Leading Retailers – Annual Sales in 2003 / 2004 (Best Estimates)
Table A.1.2	Clothing Markets North America and Western Europe
Table A.1.3	Digital Televisions & DVD Players – Annual Shipments to US Retailers
